

**Ministry of Health**

**AFRICA CENTRES FOR DISEASE CONTROL AND PREVENTION REGIONAL INVESTMENT FINANCING PROJECT (P167916)**

**EMPLOYMENT OPPORTUNITY**

**PROJECT BACKGROUND**

The Ministry of Health (MoH) with support from the World Bank is implementing the Africa Centres for Disease Control and Prevention (Africa CDC) Regional Investment Financing Project (ACDCP) which aims to enhance Public Health Security capacity by supporting the establishment of infectious disease control systems on the African continent.

The Africa CDC is a specialized technical institution of the African Union established to support public health initiatives of Member States and strengthen the capacity of their public health institutions to prevent, detect, control, and respond quickly and effectively to disease threats. To help Africa CDC and countries in the region cope with the burden of disease threats and outbreaks, the World Bank has provided funding to the Africa CDC headquarters in Addis Ababa, the Ethiopian Public Health Institute (EPHI) and the Zambia National Public Health Institute (ZNPHI) for strengthening vital institutional capacities to execute measurable public health functions through the Africa Centers for Disease Control and Prevention Regional Investment Financing Project (ACDCP).

The overall Project Development Objective (PDO) is to support Africa CDC to strengthen continental and regional infectious disease detection and response systems.

Under the ACDCP, Ministry of Health/ZNPHI seeks to engage a Civil Engineer to participate and contribute to all phases of construction work including planning, designing, and overseeing the construction.

**a. Duty Station: Zambia National Public Health Institute-Lusaka**

**b. Reports to: Project Coordinator – ACDCP**

**c. Title: Civil Engineer (1 Post)**

**1. OBJECTIVES OF THE ASSIGNMENT**

Lead the Civil/structural engineering component of the construction project from early concept through design development. Review drawings, specifications, and construction documents. Consult with clients to determine their requirements.

The Civil Engineer will primarily be responsible for implementation of the approved Quality Assurance and Management Plan for Works, from Design Stage, Construction Stage until Project Completion Stage to ensure adherence to set standards and Quality.

## Main Duties/Accountabilities

Item No.	Key Result Area	Principal Responsibilities
1	Planning and design	<ul style="list-style-type: none"> <li>• Participate in and provide technical/engineering input in the design of the construction works.</li> <li>• Participate in pre-bid meetings and bidding processes through the assigned committee for the selection of vendors and provide technical input to the preparation of tenders, during bid evaluation process and in the preparation of the construction contracts preapproval by management.</li> <li>• Participate in procurement of construction related works, from tender preparation to evaluation and ensure adequate technical consideration are in place before award of construction contract.</li> <li>• prepare the necessary applications for development consent and permits with relevant Ministries and Authorities.</li> <li>• Review and recommend construction designs for approval and ensure these are in line with Government and World Bank standards</li> </ul>
